ARMRQ MX BLACK

ARMRQ MX shafts are Made in Japan using the highest quality materials at Honma Golf HQ in Sakata. Featuring proprietary designs using NEW 10 Axis Sheet Metal Hybrid Armour Technology (4-Axis Aluminum and 6-Axis Carbon) to deliver Counter-Balance designs for added clubhead speed, along with industry leading Toray Composite M40X and T1100G Carbon, ARMRQ shafts deliver progressively faster speed and added control as players progress from 2-Star, through to 5-Star offerings.

ARMRQ MX 5S

ARMRQ MX 4S

TECHNOLOGY

DRIVER

NEW Radial L-Cup Face, NEW Triple Sole Slot, and NEW Ti811 Thin Crown Design combine to offer the very best in BERES speed, high-launch, low-spin performance with added draw bias for more forgiveness.

FAIRWAYS & UTILITIES

Featuring NEW Triple Sole Slot, Thin Crown Design, a Thin and Flexible Face, and Low-CG weight distribution designed independently for each head, BERES Fairways and Hybrids offer unprecedented distance through ample speed, high launch trajectory, and easy to play draw-biased forgiveness.

IRONS

Featuring a wide L-Cup Design utilizing New Ultra-Thin Face which uses Vertical Slits specifically arranged to improve the strength of the face insert to allow for maximum speed and forgiveness. Coupled with one external and two internal sole slots, as well as a Low-Deep Center of Gravity, BERES Irons are easy to launch high with strong carry distance. An 8620 Forged Body∗ delivers Honma's hallmark feel for the most discerning of players.
